

ECOINVENT V2.2 – LIFE CYCLE INVENTORY DATASETS FOR UMBERTO

This database is developed by the Swiss Centre for Life Cycle Inventories (ecoinvent Centre) and contains more than 4000 generic harmonised LCI datasets.

All data is systematically compiled and tested by LCA professionals.

With more than 2500 customers from over 40 countries, the ecoinvent database is the internationally most renowned and acknowledged LCA platform.

The ecoinvent data v2.2 is the solution for your data needs in Integrated Product Policy (IPP), Environmental Product Declaration (EPD), Life Cycle Assessment (LCA), Life Cycle Management (LCM), and Design for Environment (DfE).

A complete list of ecoinvent datasets can be sent per email.

INVENTORY DATA AND ASSESSMENT METHODS

ecoinvent 2.2 contains life cycle inventory datasets from many areas, such as:

- Energy
- Chemicals
- Plastics
- Metals
- Transportation & Mobility
- Waste Treatment
- Building Materials
- Agriculture (incl. Pesticides)
- Information and Communication Technology
- Electronics
- Biofuels and Biomaterials
- Mechanical Engineering and Processing
- Paper Industry

USE ECOINVENT DATA

The ecoinvent web-interface provides login for members and guests to browse for any desired datasets. Use of the ecoinvent database requires a membership. Members are able to directly access and download the comprehensive

Additionally these assessment methods are contained in the ecoinvent database:

- Cumulative Energy/Exergy Demand (CED/CExD)
- Impact-oriented characterisation (CML 2001)
- Env. Design of Industrial Products (EDIP 1997 & 2003)
- Eco-indicator 99 (all three perspectives)
- Ecological Footprint
- Ecological Scarcity 1997 & 2006
- Environmental Damage Potential (EDP)
- Environmental Priority Strategy (EPS 2000)
- Climate change (IPCC 2001 & IPCC2007)
- IMPACT 2002+
- TRACI
- ReCiPe, Midpoint and Endpoint
- USEtox

ECOSPOLD DATA EXCHANGE FORMAT

All process datasets are well documented and are provided in the international EcoSpold data exchange format. They can be viewed using Microsoft Excel, and may be used in LCA projects in research, industry and consultancies. Datasets can be imported and exported through the integrated

process datasets of the ecoinvent database. As Umberto user you'll receive all data in an Umberto library delivered on a separate DVD. Datasets can be comfortably installed and used on a local system.

EcoSpold interface in Umberto. Datasets from other databases can be imported as well, if it exists in EcoSpold format. Please consider that the maximum ecoinvent v2 installation requires approx. 10,5 GB disk space and can't be installed on a FAT 32 drive.
