

Installation instructions for Umberto LCA+ Update

- If you're installing the new software on a computer that already runs Umberto NXT, you will not need a new license key.
- If installing the software on a separate computer, please make sure you deactivate your current Umberto NXT license beforehand.
- You can use both versions (Umberto+ as well as Umberto NXT) on one computer. However, we recommend using the latest Umberto+ version.
- After opening a model or module from the module gallery in Umberto LCA+ you cannot open it in Umberto NXT anymore.
